

Hi,

Thank you for your interest in having your animal spayed/neutered with Mallard Point. We have now decided to allow you to make an appointment time that works best for your schedule. Please call Mallard Point at (815) 467-48255 to make your appointment.

I have attached the authorization for surgery, please print (1 for each animal) and complete the form to bring with you that morning of your appointment.

Please write your animal's name on the Patient Name line, and then read through the Surgical Authorization and Pre-Surgical Blood Analysis. Check the correct line for the Spay (female) and Neuter (male).

NO Food or water after midnight prior to day of surgery.

A couple things to point out -

*We have added a wellness package option, please read through them and understand that we are offering all the needed vaccines to keep your animal healthy, please discuss the options with the doctor.

*Pre-surgical blood work is optional, but it will check for functioning kidneys and liver and ensure the animal can process the anesthesia. It can also be beneficial to have a baseline blood work panel for your animal to have for future comparisons.

*IV Catheter and Fluids is also optional, it will keep the animal hydrated during and after surgery and helps with recovery.

Both of these items are discounted and can be beneficial to the animal, but are not required.

*Pain meds are also optional and can be discussed with the veterinarian when you pick up your pet.

All animals MUST have proof current rabies. If not current, please check the box for the discounted rabies and tag for the additional \$25.

Please complete the contact information at the bottom of the sheet.

If you have any questions or problems, please feel free to contact our office or Mallard Point directly at 815-467-4855.

Thanks!
Sarah
